ANEXO INFORMACIÓN DE SEGURIDAD

Verifique la carátula de este manual para conocer cuál de los siguientes dispositivos de seguridad posee su vehículo.

**SISTEMA ANTIBLOQUEO
DE FRENOS**

Sistema diseñado para evitar que las ruedas se bloqueen al frenar de forma brusca mientras se circula en línea recta, el sistema regula automáticamente la fuerza de frenado.

Aunque el sistema ABS proporciona estabilidad al detenerse, recuerde las siguientes características:

- * Para frenar de forma eficaz, deje de acelerar y utilice la leva de freno delantero y el pedal de freno trasero simultáneamente, de la misma manera que en el sistema de frenos de una motocicleta convencional
- * El ABS no puede compensar las condiciones adversas de la carretera, un error de juicio o un uso incorrecto de los frenos.

**SISTEMA DE ENCENDIDO
AUTOMÁTICO DE LUCES (AHO)**

Sistema diseñado para que una vez se ponga el motor en marcha, la luz principal de la farola se encienda automáticamente.

Este sistema garantiza una mayor visibilidad del vehículo para los demás actores viales.

**SISTEMA DE LUCES DE
CIRCULACIÓN DIURNA (DRL)**

Sistema de iluminación LED, el cual se enciende automáticamente al girar el interruptor de encendido a "ON".

Mientras la farola principal esté apagada, la luz LED alumbrará intensamente, si se enciende la farola principal, la luz LED se atenuará automáticamente.

No se recomienda dejar el interruptor de encendido en "ON" mientras el motor no esté en funcionamiento porque la batería se drenará prematuramente.

PREFACIO

Es nuestro placer presentarles a ustedes el Catálogo de Partes.

Este Catálogo ha sido especialmente diseñado para ayudarle en la selección de las partes correctas con el fin de mantener el vehículo en las mejores condiciones.

Los repuestos originales están sujetos a un exigente estándar de control de calidad, por lo tanto es necesario que usted sólo use repuestos originales.

En nuestro constante esfuerzo para mejorar la eficiencia y desempeño de su vehículo, las especificaciones, diagramas y número de partes pueden cambiar sin previo aviso. Consecuentemente las descripciones de los repuestos en este Catálogo pueden no ser las finales y definitivas.

Las alteraciones y modificaciones que ocurren en la impresión de este Catálogo, serán informadas a nuestra red, a través de circulares de Servicio o en nuestra página web: www.auteco.com.co accediendo al link repuestos. Es requisito que usted actualice su Catálogo y haga las correcciones necesarias, una vez reciba dichas circulares. Lo anterior le asegurará un rápido y adecuado despacho de sus partes, pues las órdenes están siendo diligenciadas con las referencias más actualizadas.

En caso de necesitar asistencia técnica, comunicarse con el Distribuidor Autorizado o llamar al Departamento de Servicios Auteco.

PROPIEDADES
BENEFICIOS

- Buena protección contra el desgaste
Ayuda a prolongar la vida útil del motor.
- Estabilidad térmica y contra la oxidación
Ayuda a mantener los motores limpios para proporcionar una operación más suave, posibilitando la extensión de frecuencia de cambios de aceite.
- Buena protección contra la corrosión
Protege los componentes críticos del motor contra los ácidos de la combustión y la humedad.

Recomendado para las motocicletas
con viscosidad **20W-50**

This diagram illustrates the assembly of the rear suspension components. It shows the upper control arm (1) being positioned above the lower control arm (2). The shock absorber (3) is shown being inserted into the lower control arm. A grey arrow points to the right, indicating the direction of assembly.

This exploded view diagram illustrates the assembly of a 2-stroke engine. The components are numbered as follows:

- 1:** Four long screws for the cylinder head.
- 2:** A shorter screw for the cylinder head.
- 3:** Two screws for the cylinder head gasket.
- 4:** A gasket for the cylinder head.
- 5:** A piston pin.
- 6:** A piston pin clip.
- 7:** A piston pin clip.
- 8:** A piston pin clip.
- 9:** A piston pin clip.
- 10:** Two screws for the crankcase.
- 11:** A gasket for the crankcase.
- 12:** The crankcase.
- 13:** A pin for the crankcase.
- 14:** Two O-rings for the crankcase.
- 15:** A gasket for the crankcase.
- 16:** A gasket for the crankcase.
- 17:** A gasket for the crankcase.
- 18:** A gasket for the crankcase.
- 19:** A gasket for the crankcase.
- 20:** A pin for the crankcase.
- 21:** A pin for the crankcase.
- 22:** A pin for the crankcase.
- 23:** A gasket for the cylinder head.
- 24:** A gasket for the crankcase.
- 25:** A gasket for the crankcase.
- 26:** A pin for the crankcase.
- 27:** A pin for the crankcase.

[illegible]

This diagram illustrates the exploded view of a mechanical assembly, likely a suspension or steering component. The parts are numbered 1 through 13:

- 1:** A small cylindrical pin or bolt.
- 2:** A circular flange or washer.
- 3:** A large gear or sprocket with multiple teeth.
- 4:** A small cylindrical pin or bolt.
- 5:** A long, thin cylindrical rod or shaft.
- 6:** A complex assembly featuring a cylindrical body with a flange and a mounting bracket.
- 7:** A large cylindrical component, possibly a bearing or a housing.
- 8:** A small circular disc or washer.
- 9:** A small circular disc or washer.
- 10:** A coiled spring.
- 11:** A coiled spring.
- 12:** A long, thin cylindrical rod or shaft.
- 13:** A long, thin cylindrical rod or shaft.

The diagram shows the relative positions and assembly sequence of these components, with dashed lines indicating the alignment of the parts.

4

This diagram illustrates the components of a bicycle seat assembly in an exploded view. The parts are numbered as follows:

- 1**: A small bolt or screw.
- 2**: A small washer or spacer.
- 3**: A small washer or spacer.
- 4**: The main seat post clamp, featuring a central bolt hole and a circular opening.
- 5**: A small circular cap or plug.
- 6**: The seat rail, which is a curved metal or plastic piece.
- 7**: A small bolt or screw.
- 8**: The seat cushion, shown as a large, elongated, teardrop-shaped pad.
- 9**: The seat cover or saddle cloth, which is a rectangular piece with a curved edge.

5

This diagram illustrates the exploded view of a water pump assembly. The components are labeled as follows:

- 1**: Two small cylindrical components, likely O-rings or seals, positioned to be installed into the pump housing.
- 2**: The main pump housing, which is a cast metal part with a central circular opening and several mounting points.
- 3**: A series of curved, overlapping segments, likely a fan or impeller, shown separately from the housing.
- 4**: A circular gasket or seal, positioned to be installed between the pump housing and the impeller.

This technical drawing is an exploded view of a mechanical assembly, likely a pump or engine component. The main body is labeled 1. Various parts are shown in their relative positions with dashed lines indicating assembly paths. The parts are numbered as follows:

- 1: Main housing or body.
- 2: Two small rectangular components, possibly seals or gaskets, located at the bottom.
- 3: A small cylindrical component on the right side.
- 4: A small cylindrical component on the right side.
- 5: Three small cylindrical components on the left side.
- 6: A small cylindrical component on the left side.
- 7: A small L-shaped component on the left side.
- 8: A circular component on the left side.
- 9: Two long cylindrical components on the left side.
- 10: A small cylindrical component on the left side.
- 11: Five small rectangular components, possibly seals or gaskets, located at the top and bottom.
- 12: A circular component on the right side.

8

This exploded view diagram illustrates the assembly of a washing machine door. The components are numbered as follows:

- 1**: Main door frame or housing.
- 2**: Small pin or screw at the top right.
- 3**: Large, irregular gasket or seal.
- 4**: Ring component with internal structure.
- 5**: Small pin or screw on the right side.
- 6**: Ring component with internal structure, similar to 4 but with different internal details.
- 7**: Small pin or screw at the top right, similar to 2.
- 8**: Multiple screws used for assembly, shown in various positions.
- 9**: Small component, possibly a latch or hinge part.
- 10**: Small component, possibly a latch or hinge part, similar to 9.
- 11**: Small component, possibly a latch or hinge part.
- 12**: Small component, possibly a latch or hinge part.

This diagram illustrates the exploded view of a mechanical assembly, likely a timing belt drive or a similar rotating mechanism. The components are numbered 1 through 16. The assembly is shown in a perspective view, with a dashed line indicating the alignment of the parts. The components include:

- 1**: A large, circular, ribbed component, possibly a timing belt or a large gear.
- 2**: A small, circular, flat component, possibly a washer or a spacer.
- 3**: A small, cylindrical component, possibly a pin or a small shaft.
- 4**: A large, circular, ribbed component, similar to 1, but with a different profile.
- 5**: A small, circular, flat component, similar to 2.
- 6**: A small, cylindrical component, similar to 3.
- 7**: A small, circular, flat component, similar to 2.
- 8**: A small, cylindrical component, similar to 3.
- 9**: A small, circular, flat component, similar to 2.
- 10**: A large, circular, ribbed component, similar to 1.
- 11**: A large, circular, ribbed component, similar to 1.
- 12**: A large, circular, ribbed component, similar to 1.
- 13**: A large, circular, ribbed component, similar to 1.
- 14**: A small, cylindrical component, similar to 3.
- 15**: A small, cylindrical component, similar to 3.
- 16**: A small, cylindrical component, similar to 3.

12

FIGURA N° 12: TRANSMISIÓN

FIGURA N° 12: TRANSMISIÓN

[illegible][illegible]

This diagram shows an exploded view of a mechanical assembly. The components are numbered as follows:

- 1:** Four screws used for mounting.
- 2:** A large gear or pulley.
- 3:** A small pin or bush.
- 4:** A bracket or housing component.
- 5:** A smaller gear or pulley.
- 6:** A small square block or bush.
- 7:** A screw for the end bracket.
- 8:** A pin or bush connecting the end bracket to the main assembly.
- 9:** The main bracket or housing.
- 10:** A small pin or bush.

The assembly is shown in a perspective view, with dashed lines indicating the alignment and fit of the parts.

[illegible]

This exploded view diagram illustrates the assembly of a mechanical component, likely a motor or actuator. The parts are numbered 1 through 12. The assembly is shown in three main sections:

- Top Section:** A cylindrical component (10) is shown with a mounting bracket (11) and a pin (12) attached to its side. A small gear (9) is positioned below the bracket.
- Bottom Section:** A larger cylindrical component (5) is shown with a mounting bracket (3) and a pin (4) attached to its side. A small gear (2) is positioned below the bracket. A large gear (1) is shown to the right of the main assembly.
- Left Section:** A component (8) is shown with a mounting bracket (7) and a pin (6) attached to its side. A small gear (9) is positioned below the bracket.

The diagram uses dashed lines to indicate the alignment and assembly sequence of the parts. The numbers 1 through 12 are used to identify each individual component.

16

This diagram shows an exploded view of a medical device, likely a patient warming unit. The components are labeled with numbers 1 through 6:

- 1**: The main rectangular device housing with a control panel on the right side.
- 2**: A small rectangular component, possibly a sensor or connector, shown above the main unit.
- 3**: Two long, thin, cylindrical components, likely heating elements or sensors, positioned to the right of the main unit.
- 4**: Multiple circular components, possibly O-rings or mounting flanges, distributed around the main unit and the heating elements.
- 5**: A long, thin, rectangular component, likely a heating pad or sensor mat, positioned below the main unit.
- 6**: A curved, flexible component, likely a sensor or connector, positioned below the main unit.

This exploded view diagram illustrates the assembly of a mechanical component, likely a pump or actuator. The main assembly consists of a central shaft (3) with a handle (2) at one end and a pump head (1) at the other. The pump head (1) is connected to a pump body (13) which houses a piston (12) and a connecting rod (11). The piston (12) is linked to a crankshaft (10) which is mounted on a base (9). The crankshaft (10) is connected to a lever arm (8) which is pivoted on a support (7). The lever arm (8) is connected to a rod (6) which is attached to a handle (5). The handle (5) is connected to a rod (4) which is attached to a handle (3). The handle (3) is connected to a rod (2) which is attached to a handle (1). The handle (1) is connected to a rod (38) which is attached to a handle (37). The handle (37) is connected to a rod (36) which is attached to a handle (35). The handle (35) is connected to a rod (34) which is attached to a handle (33). The handle (33) is connected to a rod (32) which is attached to a handle (31). The handle (31) is connected to a rod (30) which is attached to a handle (29). The handle (29) is connected to a rod (28) which is attached to a handle (27). The handle (27) is connected to a rod (26) which is attached to a handle (25). The handle (25) is connected to a rod (24) which is attached to a handle (23). The handle (23) is connected to a rod (22) which is attached to a handle (21). The handle (21) is connected to a rod (20) which is attached to a handle (19). The handle (19) is connected to a rod (18) which is attached to a handle (17). The handle (17) is connected to a rod (16) which is attached to a handle (15). The handle (15) is connected to a rod (14) which is attached to a handle (13). The handle (13) is connected to a rod (12) which is attached to a handle (11). The handle (11) is connected to a rod (10) which is attached to a handle (9). The handle (9) is connected to a rod (8) which is attached to a handle (7). The handle (7) is connected to a rod (6) which is attached to a handle (5). The handle (5) is connected to a rod (4) which is attached to a handle (3). The handle (3) is connected to a rod (2) which is attached to a handle (1).

This diagram illustrates the exploded view of a mechanical assembly, likely a hydraulic cylinder or actuator. The components are numbered as follows:

- 33**: Main vertical shaft or rod.
- 32**: Secondary vertical shaft or rod.
- 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 34, 35, 36, 37, 38**: Various internal components, including seals, bearings, and structural parts.

The diagram shows the assembly's internal structure, including the main shaft (33), the secondary shaft (32), and the various internal components (1-38) that form the actuator's body and internal mechanism.

- 10**: Hub nut
- 11**: Hub nut
- 12**: Brake disc
- 13**: Brake disc mounting bolts
- 14**: Hub nut

24

This diagram illustrates the assembly of a water pump. The components are numbered as follows:

- 1**: The main pump housing, which includes a mounting bracket and a circular inlet/outlet.
- 2**: A circular gasket or seal that fits into the pump housing.
- 3**: A screw or bolt used for securing the pump housing and the filter cover.
- 4**: A flexible hose or pipe that connects to the pump's inlet/outlet.
- 5**: A small connector or fitting that links the hose to the pump housing.
- 6**: A rectangular filter cover with a mesh screen, designed to be attached to the side of the pump housing.

25

This exploded view diagram illustrates the assembly of a car engine. The central component is the engine block (1), which is surrounded by various parts including the intake manifold (2), timing belt (3), and water pump (4). The diagram also shows the installation of the timing belt tensioner (5), the timing belt guide (6), the timing belt (7), the timing belt tensioner pulley (8), the timing belt guide pulley (9), the timing belt tensioner pulley (10), the timing belt guide pulley (11), the timing belt tensioner pulley (12), the timing belt guide pulley (13), the timing belt tensioner pulley (14), the timing belt guide pulley (15), the timing belt tensioner pulley (16), the timing belt guide pulley (17), the timing belt tensioner pulley (18), the timing belt guide pulley (19), the timing belt tensioner pulley (20), the timing belt guide pulley (21), the timing belt tensioner pulley (22), the timing belt guide pulley (23), the timing belt tensioner pulley (24), and the timing belt guide pulley (25). The diagram is labeled with numbers 1 through 26, corresponding to the parts shown.

This diagram illustrates the assembly of the rear suspension system, specifically the connection between the rear axle and the rear crossmember. The components are numbered as follows:

- 1:** Rear axle housing.
- 2:** Rear axle shaft.
- 3:** Rear axle nut.
- 4:** Rear axle seal.
- 5:** Rear axle tube.
- 6:** Rear crossmember.
- 7:** Rear crossmember bracket.
- 8:** Rear axle nut.
- 9:** Rear axle seal.
- 10:** Rear axle housing.
- 11:** Rear axle shaft.
- 12:** Rear axle nut.
- 13:** Rear axle seal.
- 14:** Rear axle nut.

The diagram shows the rear axle assembly (1-5) being connected to the rear crossmember (6) via the rear axle nut (14). The rear crossmember bracket (7) is also shown. The rear axle housing (10) and rear axle shaft (11) are shown in a dashed box, indicating they are part of the rear axle assembly. The rear axle nut (12) and rear axle seal (13) are also shown in a dashed box, indicating they are part of the rear axle assembly.

28

This diagram illustrates the assembly of a fuel system component, likely a fuel injector or valve. The main body (1) is shown with various ports and mounting points. Key components and their assembly sequence are indicated by numbers:

- 1**: Main body of the component.
- 2**: O-ring for the bottom port.
- 3**: Nut for the bottom port.
- 4**: Gasket for the bottom port.
- 5**: Mounting bracket for the bottom port.
- 6**: O-ring for the side port.
- 7**: Nut for the side port.
- 8**: O-ring for the top port.
- 9**: Hose assembly with a clamp.
- 10**: Top cap or plug.
- 11**: Spring and pin assembly.
- 12**: Pin for the spring assembly.
- 13**: Spring for the pin assembly.
- 14**: Pin for the top cap.
- 15**: O-ring for the top cap.
- 16**: Nut for the top cap.

This exploded view diagram illustrates the assembly of a motorcycle helmet. The main components are labeled as follows:

- 1**: The outer shell, shown in two pieces (left and right) that meet at the front.
- 2**: The upper rear section of the helmet shell.
- 3**: The lower rear section of the helmet shell.
- 4**: Various small plastic clips and mounting brackets used to secure the shell pieces.
- 5**: A small circular component, likely a ventilation or adjustment knob.
- 6**: A small circular component, possibly a fastener or seal.
- 7**: A small circular component, possibly a fastener or seal.
- 8**: A small circular component, possibly a fastener or seal.
- 9**: A small rectangular component, possibly a ventilation or adjustment knob.
- 10**: A small rectangular component, possibly a ventilation or adjustment knob.
- 11**: A small rectangular component, possibly a ventilation or adjustment knob.
- 12**: A small rectangular component, possibly a ventilation or adjustment knob.
- 13**: A small rectangular component, possibly a ventilation or adjustment knob.
- 14**: A small rectangular component, possibly a ventilation or adjustment knob.
- 15**: A small rectangular component, possibly a ventilation or adjustment knob.
- 16**: A small rectangular component, possibly a ventilation or adjustment knob.
- 17**: A small rectangular component, possibly a ventilation or adjustment knob.
- 18**: A small rectangular component, possibly a ventilation or adjustment knob.
- 19**: A small rectangular component, possibly a ventilation or adjustment knob.

[illegible]

This exploded view diagram illustrates the assembly of a mechanical component, likely a bracket or housing. The components are numbered 1 through 11. The diagram shows the following parts and their assembly relationships:

- Component 1:** The main housing or bracket, shown in two orientations (top and bottom).
- Component 2:** A small rectangular plate that fits into the top of component 1.
- Component 3:** A small circular cap or plug that fits into a hole in component 1.
- Component 4:** A small circular cap or plug that fits into a hole in component 1.
- Component 5:** A small rectangular plate that fits into the bottom of component 1.
- Component 6:** A small rectangular plate that fits into the bottom of component 1.
- Component 7:** A small rectangular plate that fits into the bottom of component 1.
- Component 8:** A small rectangular plate that fits into the bottom of component 1.
- Component 9:** A small rectangular plate that fits into the bottom of component 1.
- Component 10:** A small rectangular plate that fits into the bottom of component 1.
- Component 11:** A small rectangular plate that fits into the bottom of component 1.

The diagram uses dashed lines to indicate the alignment and fit of the components. The components are shown in a disassembled state, allowing for a clear view of their individual shapes and how they relate to each other in the final assembly.

35

This diagram illustrates the assembly of a mechanical linkage system. The components are numbered as follows:

- 1:** A long bolt or screw used to secure the assembly to a base.
- 2:** A coiled spring that provides tension to the linkage.
- 3:** A small pin or bushing that fits into the spring mechanism.
- 4:** A pin or bushing located at the top of the linkage arm.
- 5:** A pin or bushing at the bottom pivot point of the linkage arm.
- 6:** A small pin or bushing connecting the bottom of the linkage arm to the base.
- 7:** A long, thin rod or shaft that forms the main body of the linkage arm.
- 8:** A pin or bushing located on the side of the linkage arm.
- 9:** A pin or bushing on the side of the linkage arm.
- 10:** A pin or bushing on the side of the linkage arm.
- 11:** A pin or bushing on the side of the linkage arm.
- 12:** A pin or bushing at the end of the linkage arm.

The diagram shows how these parts are assembled into a functional linkage mechanism, with lines indicating the placement of each component.

[illegible]

This exploded view diagram illustrates the assembly of a motorcycle headlight. The main components are labeled as follows:

- 1**: The main headlight housing, which is a rectangular unit with a curved front and a mounting bracket on the side.
- 2**: A small electrical connector or plug.
- 3**: Two small screws or bolts used for mounting.
- 4**: A long screw or bolt used for securing the housing.
- 5**: Multiple small screws or bolts used for internal assembly and securing the lens.
- 6**: A circular gasket or seal.
- 7**: A long screw or bolt used for mounting the housing to the frame.
- 8**: A circular gasket or seal.
- 9**: The internal reflector or lens assembly, which is a curved, ribbed structure.
- 10**: A small screw or bolt used for internal assembly.
- 11**: The protective headlight lens, which is a clear, rectangular unit with a central circular opening.

The diagram shows the relative positions of these components, with dashed lines indicating the assembly path and alignment.

FICHA TECNICA TNT 150I

CARACTERISTICA	UNIDAD
Motor	Monocilíndrico 4 Tiempos 4 Válvulas SOHC, Refrigerado por Aire, con Radiador de Aceite
Diámetro x Carrera	57.3 x 58 mm.
Indicé de Compresión	9.8 : 1
Potencia Máxima	13.1 HP @ 9000 RPM
Torque Máximo	11.5 NM @ 7000 RPM
Bujía	NGK CR7HSA
Arranque	Eléctrico
Transmisión	Mecánica 5 Velocidades
Sistema de Alimentación	Inyección Electrónica DELPHI
Refrigeración	Refrigerado por Aire, con Radiador de Aceite
Velocidades	5
FRENOS	
Freno Delantero	Disco Frotante de 280 mm con Mordaza de 4 Pistones
Freno Trasero	Disco de 240 mm.
Tipo de Asistencia al Frenado	Freno de Disco Delantero y Trasero convencionales
SUSPENSION	
Suspensión Delantera	Barras Invertidas de 41 mm y 120 mm de Recorrido
Suspensión Trasera	Monoshock de 51 mm de Recorrido, Ajustable en Precarga
CAPACIDAD DEL TANQUE	
Lleno	13.5 Litros (3.56 Galones)
Combustible	Gasolina Corriente
LLANTAS	
Llanta Delantera	100/80 R17
Llanta Trasera	130/70 R17
Rines	Aspas de Aleación
SISTEMA ELECTRICO	
Bombillo Farola	12V-35/35W
Luz de Stop	LED
Luces Direccionales	LED
Velocímetro	Digital
Batería	12V-6AH
Sistema de Ignición	TLI
DRL	Si
AHO	Si
DIMENSIONES	
Largo x Ancho x Alto	2050 mm x 810 mm x 1065 mm.
Distancia Entre Ejes	1365 mm.
Peso en Seco	134 Kg.
